Exploring Science

As part of the transition from Primary to Secondary education the Year 6 team have established a link with the Science department at Fortismere School in order for the children to undertake scientific learning within a secondary environment, using equipment and lab facilities under the direction of a secondary science teacher.

This is a wonderful opportunity for the children to begin to make their transition journey into secondary as well as taking advantage of being taught by Mr Sharma, one of the most experienced members of the science faculty at Fortismere.

The focus of the sessions will be chemistry and there will be follow on work to be completed in class as well as a booklet for

the children to complete.

Amethyst class attended the first session on Wednesday. It was exciting arriving at the school, and seeing all the bigger children; we recognized quite a few old faces! We were shown into the 'lab' and given basic rules about making sure we were all safe: We all looked very serious in our protective goggles! Mr Sharma then introduced us to the series of experiments we would be doing over the next 4 weeks. By the end of the first session, we felt much more like real chemists and look forward to the next session.

"It was so exciting! I learned all about acids and alkalis!" said Kate.
"Science here, feels much more real, I'm looking forward to doing more when we go to secondary school!" Jack.
"you get to use actual chemicals" kat
" loved experimenting with different equipment. " Jo

Cate teacher: I really enjoyed seeing the children experience a different environment and use different language in their science talk. They worked collaboratively and had to communicate really well in order to stay safe around chemicals and new equipment. I was very proud of them, and am looking forward to the next session.
