

Headteacher and Chair of Governor's Challenge: It's Design Time

Want to be an Apprentice? Want to be a designer? It's time to design!

This is an **optional** additional homework challenge!

The Brief:

Design a product that will make every child and teacher's life at school a little more organised. This can be whatever you want it to be but it must creatively make your classroom space more organised in some way...

For example:

Keeping books in trays? Is there a better classroom solution to this problem?

Pencil pots in the centre of desks? Surely there must be a better or more organised solution?

Is your teacher always losing the projector remote? Help them out with a solution!

A few details:

- We are not asking you to make a product just to design it.
- You can have help from a family member. This is all about teamwork and creative ideas!
- There is no prize but we will take photos to put on the website and lead a celebration assembly of your great ideas.
- Entry deadline **Thursday 4th January 2018**. Please don't bring any designs in before then!
